

# MOLGENIS source code

You can check the latests version (currently 3.3) of the MOLGENIS code via the [browser](#) or check it out from our open repository at <http://www.molgenis.org/svn>.

If you want to keep track of what is happening in the svn, you can connect to the commit channel at <http://groups.google.com/group/molgenis-commits/>

## What do I need?

MOLGENIS consists of two main components. Current version is 3.3:

1. The software generator 'molgenis'. Check out from <http://www.molgenis.org/svn/molgenis/3.3>
2. The application template 'molgenis\_distro'. Check out from [http://www.molgenis.org/svn/molgenis\\_distro/3.3](http://www.molgenis.org/svn/molgenis_distro/3.3)

Inside the molgenis\_distro you will find in handwritten the 'MolgenisGenerate.java' program. See [MolgenisGuide](#) for usage.

## What is in the other packages?

- [archive](#) — contains older versions
- [molgenis](#) — core project. Inside are Eclipse projects, each folder a version
- [molgenis\\_distro](#) — the application template. Inside are Eclipse projects, each folder a version
- [molgenis\\_test](#) — series of models and test suites to verify MOLGENIS functionality
- [molgenis\\_online](#) — development of the online version of MOLGENIS generator
- [molgenis\\_processing](#) — development of processing components as extension to molgenis
- [molgenis\\_taverna\\_plugin](#) — development of a taverna workbench plugin to access MOLGENIS more easily than just web services

Temporary, need to be cleaned up:

- molgenis3\_4\_1
- molgenis4eb
- molgenis4xgap\_importwizard
- molgenis\_online
- molgenis\_plugin\_matrix
- sequence\_lims — development of a sequence lims
- tags
- xmi\_to\_molgenis — convertor from xmi (UML) to molgenis.xml
